

LIZ MATHEW

A results-driven and innovative professional with over 17 years of experience in designing, developing, and deploying scalable solutions across diverse industries. Skilled in leveraging emerging technologies to improve systems, drive business growth, and enhance profitability. Expertise in cloud-based solutions and software development, with a strong command of AWS, holding an AWS Certified Solutions Architect – Associate credential.

Core Competencies:

- Expert in designing and implementing microservices, choosing the right architecture patterns, for highly distributed and scalable applications.
- **Expertise in developing large data transformation using spring batch.**
- Expert in designing and developing **Front-end** application using React/Redux, integrating with microservices and ESBs for a scalable environment capable of extending to multiple regions.
- Completed multiple large scale migration projects where legacy technology solutions were replaced with modern technologies based on Java/Python various microservices utilizing aws cloud services
- Expert in deploying applications onto AWS using Jenkin, terraform, Kubernetes, OpenShift
- Expert in full stack architecture and development using React, Springboot, kafka, mongodb
- Expert in real time message processing for targeted advertisement and revenue generation
- Integration expert – Integrated mainframe systems with Salesforce, Kofax, Pentax
- Product Development: Focusing on product vision, roadmap, and execution.
- Engineering Process Improvement: Optimizing development methodologies, tools, and infrastructure.
- Cloud expert – Implemented setup box impression management for AT&T using different aws services, python and snowflake and Cassandra
- Designed and implemented setup box impression management system using
- Python, AWS, Snowflake and Cassandra
- Expert in docker containerization and optimizing hardware using Kubenetes,
- **SW Delivery:** Expert in coordinating with offshore development centers for timely and quality delivery.
- Technical Leadership: Driving architectural decisions, technology strategy, and hands-on problem-solving.

Certification/Programs

AWS certified Solution architect

Digital Transformation utilizing AI/ML.- Berkeley Haas

University of California (Apr 24 - Oct 24)

TECHNICAL SKILL

Programming Language:	Core Java, Python, Golang.
Application Framework:	Spring Framework (Spring Boot, Spring Batch).
UI Framework	React/Redux/Javascript/Typescript
Cloud Computing:	AWS(EC2, Lambda, Stepfunctions, Elasticbeanstalk, EKS)
Containers:	Docker, K8s.
Version Control:	Git, Svn.
Build And Test:	Maven, Junit.
Database -Relational:	Oracle, Cassandra.
Datawarehouse:	Snowflake.
NoSQL:	Dynamodb.
CI-CD:	Jenkins.

Resume of LIZ MATHEW

Design Tool: Figma, Lucid Chart.
Project Management: Agile, Waterfall.
Other Tools: Postman, Swagger

PROFESSIONAL EXPERIENCE

June 25 - Aug 25

Technical Project Consultant – SkanReg - St. Kitts & Nevis International Ship Registry

Domain: Maritime

Responsibilities:

Collaborated with stakeholders to evaluate requirements and define the strategic direction for a custom-built Ship Registration System, leading the development of a comprehensive product roadmap aligned with business goals and regulatory compliance needs.

Defined the strategic roadmap for a custom AI-integrated vessel registration system; utilized AI-driven components like OCR/NLP for document intake, anomaly detection for compliance risk, and chatbot support for application assistance.

Aug 23 - Mar 24

Technical Project Consultant – Direct TV(AT&T) Advertisement

Domain: Advertisement

Responsibilities:

- Involved in architecting and developing revenue building system using Springboot, springbatch which involved determining the routing of ad request based on various decision factors to respective ad servers and routing it back to the ad player.
- Developed frontend portal using React/Redux, Springboot and Postgress SQL and Snowflake
- Designed and implemented setup box impression management system using Python, AWS, Snowflake and Cassandra
- Delivered expert thought leadership by comprehending technical complexities, promoting effective communication, engaging with stakeholders, and fostering a collaborative culture. Encouraged and guided the team to think beyond their comfort zones, paving the way for transformative change.
- Designed scalable technical solutions using cloud technologies, ultimately delivering innovative solutions that drive business growth. Utilized design tools to develop these scalable technical designs.
- Provided technical leadership, mentorship, and AWS cloud setup guidance

Technologies: Spring Boot, Spring Batch, React/Redux, Java, Python, Golang, Docker, Kubernetes, Jenkins, Git

Accenture

Jun 10 - Dec 22

JPMC (Aug 22 - Dec 22)

Application Development, Technical Architect Associate Manager

Domain: Banking

Responsibilities:

- Managed the provisioning and de-provisioning of employee tools, ensuring secure access control during inter-departmental transfers and employee resignation. Spearheaded stakeholder collaboration to meticulously define project requirements, scope, and deliverables, guaranteeing alignment with overarching business objectives. Delivered technical guidance and mentorship, enhancing team proficiency in key areas.
- Led the architectural design and development of the project, implementing Spring Boot REST APIs to actualize the application's backend functionality. Leveraged core Java for robust backend logic and utilized React for dynamic and responsive frontend development.

Resume of LIZ MATHEW

- Developed and enhanced custom Java applications using Core Java and Oracle DB

Technologies: Springboot, React/Redux, Jenkin, Terraform, Oracle, DynamoDB, Cassandra, Snowflake
NYCERS (New York City Retirement Solution) (Aug 21 - Jun 22)

Application Development Associate Manager, Technical Architect Associate Manager

Domain: Retirement System

Responsibilities:

- The project involved migrating a system based on IBM mainframe solutions to Salesforce. Guided the integration of various systems, including Penfax, Kofax, and custom solutions, into the Salesforce platform using RESTful interfaces.
- Architected a solution to migrate 52 million files from IBM's FileNet system to Box Cloud, successfully mitigating potential data loss for the client. Conceptualized and presented a key Proof of Concept (POC) for converting file annotations to PDF annotations, which led to its successful implementation.
- Using core Java, developed the POC by integrating Box Cloud API, Simfloy, and IBM FileNet.
- Collaborated with the NYCERS Deputy Executive Director to understand requirements and ensure the successful execution of the project.
- As an Integration Architect, assisted in designing integrations between various third-party systems and the Salesforce ERP solution. The third-party systems included Box Cloud, Penfax (a cloud-based retirement management system), and the Kofax Image Scanning system.
- Core technology was Salesforce Apex Code, although had no hands-on involvement in Apex coding.
- Collaborated with a Canada-based team from Pentax to set up a cloud infrastructure for running Jasper Reporting tool for letter generation. Additionally, worked with the Kofax team to integrate their solution with Box Cloud Content Management system.
- Collaborated with the offshore team to help them understand the tool's functionality, bridging the gap between their business understanding and guiding them to leverage the tool effectively in building the solution.

AT&T (Targeted Advertisement) (May 16 - Apr 21)

Technology Architect Associate Manager, Technology Architect Specialist

Domain: Advertisement

Responsibilities:

- Architected the integration of the Campaign Management SalesFront End tool to pass segmented data which would help in targeting audiences for addressable and digital TV.
- Developed an innovative, configurable solution that became the foundation for multiple projects within the organization.
- Architected and managed the migration of over **50 ETL jobs** from Informatica to Spring Batch, enhancing efficiency and reducing costs.
- Designed and implemented the setup box impression management system using Python, AWS services, and Snowflake and Cassandra databases.
- Provided technical leadership and guidance to project teams, ensuring the adoption of best practices and the delivery of high-quality solutions.
- Mentored the team.
- Assisted the senior architect in conceptualizing the AWS cloud setup for the Aristos account.
- Integrations: Rest Webservice

Starwood Hotels and Resorts (Jun 10 - Dec 15)

Application Development Specialist, Lead Developer

Domain: Hospitality

Responsibilities:

- Led a team in the maintenance of the ICE and Meeting application, serving as a bridge between various booking systems.

Resume of LIZ MATHEW

- Utilized core Java and Oracle DB to develop and enhance the custom Java application.
- Collaborated with stakeholders to gather requirements, troubleshoot issues, and ensure timely delivery of solutions.

Tata Consultancy Services (TCS)

Mar 07 - Jun 10

Liberty Broadcasting and Networking – LBNI, Philippines (Nov 09 - Jun 10)

Developer

Domain: Telecom

Responsibilities:

- Worked as developer for developing a SOAP based Java application to integrate the HPSM trouble ticketing tool to OBRM solution.

ILP (Nov 08 - Jul 09)

Trainer

Responsibilities:

- Was part of the ILP team to train the new joiners.

Citi Cards (Feb 08 - Nov 08)

Module Lead

Domain: Banking

Responsibilities:

- Designed and Developed solution to integrate solution for trouble ticketing system to generate offers utilizing Cordiant CDM tool integrated utilizing core Java solution.
- Collaborated with cross-functional teams to understand requirements and deliver a seamless integration solution. Was awarded TCS GEM award for this design.

USAA (Mar 07 - Feb 08)

Developer

Domain: Insurance

Responsibilities:

- Worked as Developer for a project involving enabling movement of Money for Annuities. Architecture: SOAP

Environment: Java.

EDUCATION

MCA, University of Mysore, 2003 - 2006

BSc (Physics, Mathematics, Computer Science), St. Philomena's College, India, 2000 - 2003

TRAINING

Skill Upgradation Goals:

Berkeley Haas – University of California (Apr 24 - Oct 24)

Completed Berkeley Technology Leadership Program on Digital Transformation utilizing AI/ML.
